

## **SITUATION REPORT**

### Flood in Pakistan, September, 2022.

#### **Overview**

The humanitarian situation in Pakistan has get worse further over the past two weeks as heavy rains continue to cause flooding, and landslides resulting in displacement and damage across the country.

Sind, Balochistan and KPK have been overwhelmed by devastating floods, and other areas in KPK and Southern Punjab are at risk. Sixty-six districts have been officially declared to be 'calamity hit' by the Government of Pakistan – 31 in Balochistan, 23 in Sindh, nine in Khyber Pakhtunkhwa (KP) and three in Punjab. The situation remains dynamic, and many more districts have been affected; the number of calamity-declared districts is expected to rise as rains continue to fall.

Since June, heavy rain has caused unprecedented levels of flooding and has been described as a “monsoon on steroids” and an “unprecedented climate catastrophe” by the United Nations. Extreme flooding has left those affected in need of basic necessities such as shelter, clean water, and health services.

#### **The situation on the ground is dire:**

*figures are updated on 16 September 2022.*
